

COLONY

BIO-ENZYMATIC SPOTTER

Features & Benefits:

- NATURALLY DIGESTS ORGANIC MATERIALS THAT CAUSE STAINS AND ODORS
- ENZYMES CONTINUE TO WORK AFTER CLEANING PROCESS

Description:

A blend of specialized strains of bacteria that digest organic matter that sometimes cause foul odors and stains.

Directions:

TO DIGEST FOUL ODORS AROUND URINALS, TOILETS, ETC.

1. Dilute Colony 8 to 16oz per gallon of water, depending on degree of soil. Use as you would an ordinary cleaner to clean contaminated area.
2. While surface is still wet, spray areas thoroughly with full strength Colony. Spray daily until all entrapped odors are digested. Thereafter treatment is generally needed only weekly or monthly.

TO DIGEST ODORS IN URINAL DRAINS AND TRAPS:

Treat urinal when it will not be used for an extended period. Initially pour 6 to 32oz in trap. For continued maintenance add 40oz twice weekly. Do not flush after treatment is added.

TO DIGEST ODORS IN CARPETS, UPHOLSTERY & FABRICS & TO REMOVE ORGANIC STAINS:

1. Dilute Colony at 95oz per gallon of water.
2. Test fibers for color-fastness.
3. If color-fast, use solution to clean soiled area.
4. After cleaning, spray with full strength Colony.
5. Rinse with water. Blot up or pick up with wet vac.

Read label and SDS completely before using this product. KEEP FROM FREEZING.

Specifications:

pH: 7
